

Product description-VB1

VB1-Freshly squeezed Mixed-juice machine

VB1 model product parameters:

- 1) Dimensions:W120*D91*H196cm
- 2) LCD screen size: advertising screen 21.5 inches (Optional) and capacitive touch screen 15.6 inches (16:9);
- 3) Maximum power: 800W; Rated power: 350W; Standby: 60W;
- 4)Power consumption: 3-7kwh/day
- 5) Number of cups of juice:
Apple: 20-30 cups; Orange: 40-60 cups; Mixed juice (orange + apple/pear): 65 cups;
- 6) Storage of apples and oranges: full load is about 45kg (about 190 oranges, about 65 apples/pears);
- 7) Payment methods: Cash, Cashless(Cash banknotes,coins credit card customized);
- 8) Temperature: adjustable to a minimum of 4°C;
- 9) Self-cleaning system: equipped with intelligent cleaning system and ozone sterilization device;
- 10) Paper / Plastic Cup: 280ml/340ml/400ml with Paper plastic cover and straw dispensing;

Product description-VA1

VA1-Freshly squeezed orange juice machine

VA1 Product parameters

- 1) Dimensions/mm: W118* D91*H191cm
- 2) LCD screen size: 27 inches, 16:9 vertical screen
- 3) Maximum power: 800W; rated power: 300W
- 4) Power consumption: 3-7kwh/day
- 5) Power supply: 100-240V, 50/60Hz
- 6) Number of cups of juice squeezed: About 70-100 cups can be squeezed with a full load
- 7) Storage of oranges: Full load of about 75kg oranges (about 500pcs)
- 8) Weight: 380Kg
- 9) Payment method: Cash, Cashless(Cash banknotes,coins credit card customized);
- 10) Temperature: Adjustable to a minimum of 4°C
- 11) Self-cleaning system: equipped with intelligent cleaning system and automatic ozone sterilization device

Product description-VA1

VA1-Freshly squeezed orange juice machine

VA1 Product parameters

1) Dimensions/mm: W118*
D91*H191cm

Principle

The unique Oranfresh extrusion system, protected by global patents, produces the purest, high-quality juice.

-Oranfresh has unique and leading technology and has the following advantages

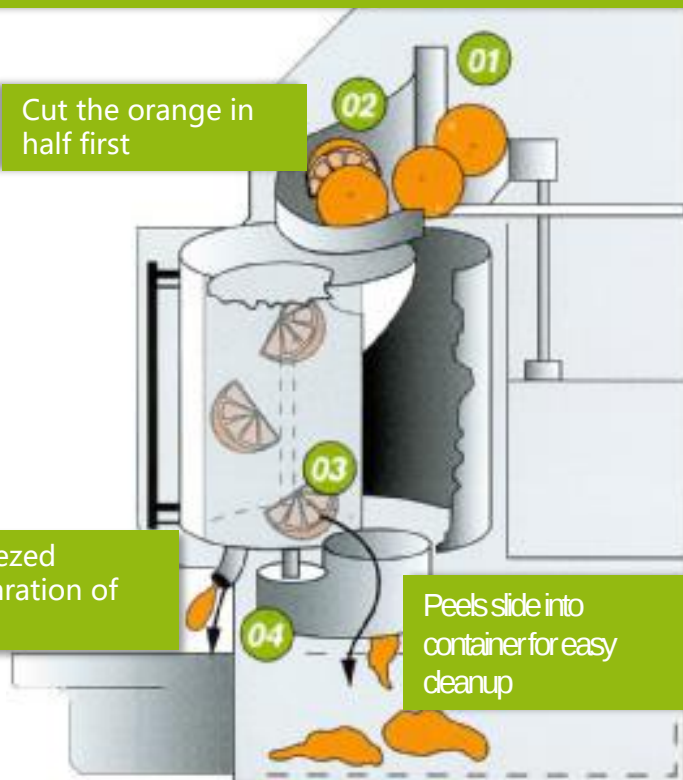

- Unique technology to separate bitter juice from peel essential oil
- Maximize the juice yield of oranges
- Easy management and time saving
- Hygienic and easy to clean

The working principle of Oranfresh juicer (as shown in the picture on the right)

The mechanical technology using stainless steel as the internal structure ensures the requirements of safety, hygiene and durability to the greatest extent. The Oranfresh brand is a symbol of unparalleled quality and 100% natural health products.

The pulp is separated and squeezed separately to complete the separation of bitter bark essential oil.

After starting up, the orange slides into the compression un

Product description-VC2

VC2-Freshly squeezed apple juice machine

1. Product parameters

- 1) Dimensions/cm: W103*D91*H193cm
- 2) LCD screen size: 15.6 inches, 16:9 vertical screen
- 3) Maximum power: 800W; Rated power: 300W
- 4) Power supply: 100~240V, 50/60Hz
- 5) Number of cups of juice squeezed: 80-100 cups can be squeezed at full load
- 6) Storage of apples: Fully loaded with about 250~280pcs of apples
- 7) Weight: 320Kg
- 8) Payment method: Cash, Cashless(Cash banknotes, coins credit card customized);
- 9) Temperature: Adjustable to a minimum of 4°C
- 10) Self-cleaning system: equipped with intelligent cleaning system and automatic ozone sterilization device

The low-speed raw juice system can squeeze only the flesh of the apples and not the core.

Product description-VS2

VC2-Freshly squeezed sugarcane juice machine

1. Product parameters

- 1) Dimensions/cm: W118*D91* H191cm
- 2) LCD screen size: 15.6 inches, 16:9 vertical screen
- 3) Maximum power: 800W; Rated power: 300W
- 4) Power consumption: 3-7KWh/day
- 5) Power supply: 100~240V, 50/60Hz
- 6) Number of cups of juice squeezed: 90-110 cups can be squeezed at full load
- 7) Storing sugarcane: Full load of about 90-110 sugar canes (D3~4.5cm, length 40~50cm))
- 7) Weight: 380Kg
- 8) Payment method: Cash, Cashless(Cash banknotes, coins credit card customized);
- 9) Temperature: Adjustable to a minimum of 4°C
- 10) Self-cleaning system: equipped with intelligent cleaning system and automatic

Food-grade stainless steel roller press increases juice yield of sugarcane

Our brand USES worm gear and worm

Worm gear and worm

Low noise, long life, smooth juicing

Traditional chain device

Loud noise, easy to rust, not smooth juicing

Our brand has a higher crush rate and less waste than other brands

Our brand

Press fruit slag loose, high yield of juice

Other brands

Small amount of juice, juice rate is not high

Stainless steel press roller

Health easy to clean, rust - proof, long life

Other stainless steel rolls

Easy to rust, short service life

Four press rolls

Detachable to clean and press faster

Other models

Internal cleaning is not easy

Advantages

1. Health assurance technology and concepts from Europe

- 1) **Intelligent cleaning system:** It has its own intelligent cleaning system with three modes: timing, fixed point and fixed cup;
- 2) **Ozone disinfection system:** It has its own ozone generator and can be disinfected at any time;
- 3) **Replaceable juicing unit:** easy to replace, centralized cleaning and disinfection;
- 4) **Keep the food fresh at a constant temperature of 4 degrees:** The low temperature locks in freshness, prevents the loss of nutrients, and prevents the growth of bacteria.

2. The process is transparent and health is visible

- 1) **Large-area fully transparent glass windows:** the quality of the oranges and whether they are clean can be seen at a glance;
- 2) **The working process is directly displayed:** how the orange falls and how to cut it is clear at a glance;
- 3) **Integration of entertainment and education:** The dynamic mechanical action display keeps children lingering.

Others

- 1) **Bitter peel oil separation:** Original bitter peel oil separation patented technology, orange juice tastes better
- 2) **Full-process intelligent monitoring:** intelligent alarms for machine failures, real-time transmission of sales data, and remote control of equipment components
- 3) **100% original multi-juice:** healthy and original, without loss of nutrients
- 4) Obtained a number of international and domestic certificates such as CE\CCC\TUV for quality and food safety inspection and certification; using 24V DC power, it is safe and secure to use electricity.
